SUMMARY

Data analyst with a Master of Science in Business Analytics and three years of professional IT experience across application development and production support. Skilled in SQL, Python, and data visualization, with hands-on project experience building data warehouses, ETL pipelines, and analytics dashboards. Seeking data analyst and business intelligence roles.

EDUCATION

University of Massachusetts Amherst

Master of Science in Business Analytics — GPA: 4.0/4.0

Amherst, MA

Sep 2024 – Feb 2026

Visvesvaraya Technological University

Bachelor of Engineering in Information Science & Engineering — GPA: 8.0/10

Bangalore, India

Aug 2017 – Jun 2021

TECHNICAL SKILLS

Languages & Databases: SQL (PostgreSQL, SQL Server), Python (Pandas, NumPy), Java

Analytics & Visualization: Tableau, Power BI, Advanced Excel, Data Warehousing & Modeling, ETL, KPI Design, Dashboarding

Cloud & Tools: AWS (S3, RDS, EC2), Spring Boot, RESTful APIs, JUnit, Mockito, Swagger, SonarQube, Git, Docker, Maven, IntelliJ IDEA, JIRA, Confluence, ServiceNow, Agile/Scrum

Familiar (Coursework/Certification): Snowflake, Databricks, PySpark, Alteryx, Scikit-Learn, Seaborn

EXPERIENCE

Accenture

Software Engineer

Bangalore, India

Apr 2022 – Jun 2024

- **Contributed to reducing client onboarding time** from two weeks to four days by developing REST APIs in Java and Spring Boot for an internal platform that centralized access to GCP, Azure, and AWS provisioning tools.
- **Increased unit test coverage from 80% to 92%** across the codebase by writing tests with JUnit and Mockito, strengthening reliability of core workflows.
- **Reduced unplanned downtime by 15%** by debugging and resolving defects across application workflows during active development, collaborating closely with senior engineers.
- **Supported a Java version migration** from Java 13 to Java 17 and documented workflows to improve team knowledge sharing, tracking all work in JIRA.

DXC Technology

Software Engineer

Bangalore, India

Aug 2021 – Apr 2022

- **Resolved production support tickets within one hour of creation** through ServiceNow on a lean support team, executing environment-aware file deployments across servers in a live production environment.
- **Prevented production disruptions** by performing controlled deployments of application files and asset folders while preserving environment-specific configuration files.
- **Ensured process continuity** by monitoring a scheduled daily batch job, verifying successful completion and escalating failures to senior engineers.

PROJECTS

WorldCupIQ: FIFA 2026 Predictive Analytics & AI Platform

Python, dlt, DuckDB, MinIO, XGBoost, ChromaDB, Ollama, MCP, Streamlit

[Link](#)

Jun 2026

- **Architected a zero-cloud-cost medallion lakehouse** (MinIO and DuckDB) with dlt-powered API ingestion and web scrapers, transforming 49,000+ international matches and 1,249 player records into leakage-free ML feature tables.
- **Trained an XGBoost model** that simulates 10,000 tournament runs for champion odds, with a RAG and MCP layer exposing the warehouse for natural-language querying.

Sales & Profitability Dashboard

Tableau, Excel

[Link](#)

Mar 2025

- **Built an interactive sales analytics dashboard** in Tableau from requirements through delivery, creating KPI summary tiles, category-level sales and profit breakdowns, and time-trend visuals to support business decision-making.
- **Designed a customer dashboard** with drill-down from region to product and customer segment, using parameters, LOD expressions, and KPI indicators to surface above and below target performance and period-over-period change.

Streamlining Enterprise Data: ETL Design and Integration Using SQL

SQL, SQL Server

[Link](#)

Dec 2024

- **Designed a medallion-architecture warehouse** (Bronze, Silver, Gold) in SQL Server, consolidating fragmented CRM and ERP sources into a unified analytical layer.
- **Built ETL pipelines** that ingested and transformed 100,000+ records from raw CSV files into a validated star-schema model, enforcing data quality and referential integrity at each layer.
